

Dear Recipient of the 30th EPS, Helsinki 2008, Proceedings Book

Please find in your best of convenience The Thirtieth European Peptide Symposium Proceedings. This item is five years after its original research and therefore belongs to the series of Archived EPS proceedings books at www.eurpepsoc.com.

The European Peptide Society (EPS) organizes bi-annual peptide symposium as her main activities. In the proceedings book authors of the learned society register their original research findings to which science literature refers to in novelty terms as a source book. Of the source books to peptide chemistry, the proceedings literature is at the research origins a cross-section of her activities and also suitable as a serial collection in who is who in the exercise of peptide research at the society. The present, *Proceedings of the 30th European Peptide Symposium, Peptides 2008 2nd Edition, Chemistry of Peptides in Life Science, Technology and Medicine*. H. Lankinen (Ed.), *The Finnish Peptide Society, 2013, Unigrafia, Helsinki*, links *The Finnish Peptide Society* (FIPS; www.biobio.org/peptide) to the tradition of the peptide societies in Europe. Whether in research or enterprising, the proceedings literature is an established format of peptide research publishing. The proceedings articles in form of short communications are compatible with scientific poster recordings of research findings presented at the symposium and a potential lead to the complementing articles in serial journals that have followed. In Research and Development, Archives of Proceedings of Peptide Societies is a rich collection series of contemporary topics.

With Best of Wishes to The Peptide Communities in Europe and in International Sister Societies

In Tornio Finland, 12th September 2013

Hilkka Lankinen
Editor-in-Chief
Proc 30EPS Peptides 2008
