

THE EUROPEAN  
PEPTIDE SOCIETY

The European Peptide Society (EPS) invites applications from PhD students for

## EPS Mobility Fellowships

Mobility and interdisciplinarity nowadays are important assets in research careers. The European Peptide Society provides fellowships for PhD students who want to visit another laboratory in Europe to acquire new methodology or perform experiments that are not possible at the home institution.

**Eligibility** At the time of the application the PhD student must be member of the European Peptide Society EPS membership since more than 6 months. The host must be a higher education institution or research institute in Europe.

**Conditions** A fellowship of up to 3000 € may be granted upon application. The fellowship may be used for additional costs of living connected to the mobility (maximum 500 € per month) or for travel costs (economy class, receipts need to be provided). The fellowship may be combined with funding from other sources e.g. to extend the duration of the stay. In this case the amount of funding applied for or obtained from the other sources need to be specified. Bench fees or tuition fees cannot be covered. 50% of the fellowship will be paid in advance, 50% will be paid after the final report (min. 2 pages, max. 5 pages) has been received.

**Application documents (in English language)** Application form including cost estimation | CV (including publication list) of the applicant | project description (1 page) | letter of purpose including a statement on the choice of the host institution | letters of endorsement from the current supervisor and the envisaged host.

The complete application should be sent by e-mail to the Scientific Affairs Officer  
Dr. Florine Cavelier ([florine.cavelier@umontpellier.fr](mailto:florine.cavelier@umontpellier.fr))

Applications are accepted up to 3 months before the event.

The European Peptide Society is a non-profit association established for the public benefit to promote in Europe and in neighbouring countries the advancement of education and scientific study of the chemistry, biochemistry, biology and pharmacology of peptides.
